

FOREIGN OBJECT DAMAGE (FOD) PREVENTION- QUALITY ASSURANCE

REQUIREMENTS

1. Seller shall ensure items supplied and the packaging will not be a source of Foreign Object Damage (FOD) and/or other contaminants.
2. Seller shall establish and maintain written FOD Prevention Program Practices to reduce FOD using National Aerospace Standard 412 (NAS412), as a guideline.
 - 2.1. The FOD Prevention Program Practices shall be proportional to the FOD susceptibility of the product(s).
3. The FOD Prevention Program Practices, written procedures, or policies developed by the Seller shall be subject to review and audit by HFE International and/or government representatives.

DATA SUBMISSION SUMMARY

- There is no deliverable data to HFE International required by this document.

NOTES

- Reviews and audits may be performed at the Seller to ensure effective Foreign Object Damage (FOD) Prevention Program Practices.
- Reviews and audits may result in disapproval of, or corrective action(s) issued against, the FOD Prevention Program Practices at the Seller when practices, procedures, or policies are deemed ineffective as it relates to FOD Prevention design and manufacturing methods.
